

Nazmul Haque

Senior Software Engineer | React.js | Node.js | TypeScript | Stripe Integration | Strapi

Farmgate, Dhaka | +8801785-362016 | bpinazmul18@gmail.com | [Portfolio](#) | [GitHub](#)

Professional Summary

Senior Software Engineer with 6 years of professional experience designing, developing, and maintaining production-grade web applications using React.js, Next.js, TypeScript, and Node.js. Experienced in building RESTful APIs, integrating third-party services, working with MongoDB-backed applications, and developing data-driven reporting and analytics features. Hands-on experience with Stripe payment integration and Strapi-based content management solutions. Skilled in frontend architecture, performance optimization, and building scalable, maintainable software. Actively collaborates in architectural discussions, contributes to sprint planning and code reviews, and works closely with cross-functional teams to deliver reliable, high-quality software throughout the development lifecycle.

Professional Experience

Azzin.us — *Software Engineer*

Dhaka, Bangladesh | **Nov 2025 – Present**

- Led frontend architecture and development of scalable SaaS applications using React.js, Next.js, and TypeScript, contributing to technical discussions and architectural decisions.
 - Built and maintained reusable UI components and shared frontend utilities, reducing duplicate UI development effort by approximately 40%.
 - Integrated 150+ REST API endpoints, implementing data-driven interfaces and managing API communication across application workflows.
 - Implemented and maintained authentication workflows using JWT, supporting secure access to application features and protected resources.
 - Improved application performance and maintainability through frontend optimization, legacy code refactoring, and production issue resolution, following clean code and SOLID principles.
 - Developed and released **3 production features for the existing Muallim Teacher mobile app** using React Native, integrating REST APIs, authentication, and asynchronous data workflows.
 - Developed **5 production features for the Muallim web app**, building responsive interfaces and integrating backend APIs to support core application workflows.
 - Wrote and maintained automated tests using Jest and Playwright to support component-level validation and end-to-end application testing.
 - Worked with Docker and AI-assisted coding tools to support development workflows, code implementation, debugging, and maintainability.
 - Collaborated with UI/UX designers, backend engineers, QA, and product stakeholders throughout feature development, code reviews, sprint planning, and production delivery.
-

Markopolo.AI — *Software Engineer*

Dhaka, Bangladesh | **July 2024 – Nov 2025**

- Took ownership of frontend development across Deepdive, an AI-powered analytics platform, and the Markopolo marketing web application using React.js, Next.js, and TypeScript.
 - Built Deepdive from the ground up, translating Figma designs into a reusable local component library and developing responsive, accessible interfaces and interactive analytics dashboards.
 - Developed data visualizations, transforming complex API responses into chart-ready datasets for interactive charts, filtering, drill-down analytics, and reporting workflows.
 - Implemented authentication and authorization workflows, integrated AWS Cognito, and connected frontend features with REST APIs and third-party services.
 - Revamped the legacy Markopolo marketing web application within a monorepo architecture, establishing reusable UI components and delivering responsive, accessible interfaces.
 - Contributed to backend integrations with third-party marketing APIs, including TikTok, Yahoo, Google, Facebook, and Instagram, and integrated the resulting services into frontend reporting and analytics dashboards.
 - Developed reporting features, PDF report generation, and task-triggering integrations to support marketing automation and data-driven workflows.
 - Collaborated with product, design and backend teams, conducted code reviews, mentored junior developers, and resolved production bugs while taking ownership of feature delivery and application quality.
-

Hishabee Technology Ltd. — *Frontend Developer (React)*

Dhaka, Bangladesh | **Oct 2021 – June 2024 (On-site)**

- Developed and maintained production-grade React.js and Next.js applications serving over 2 million users, delivering scalable and reliable user experiences.
- Built reusable, accessible UI components and complex user workflows using React, TypeScript, Redux Toolkit, RTK Query, Shadcn UI, and Radix UI.
- Implemented efficient client-side state management, API data fetching, and form validation using Redux Toolkit, RTK Query, React Hook Form, and Zod.
- Translated Figma designs into responsive, pixel-perfect interfaces, applying mobile-first design, cross-browser compatibility, and WCAG 2.1 accessibility practices.
- Improved frontend performance through rendering optimization, lazy loading, and efficient state management.
- Implemented localization and internationalization using i18next and react-i18next to support multilingual user experiences.
- Collaborated with backend developers, UI/UX designers, QA engineers, and product teams throughout feature development, code reviews, and Agile delivery.
- Mentored junior developers through code reviews and technical guidance, contributing to code quality and maintainable frontend architecture.

BoomDevs — Frontend Developer

Bogura, Bangladesh | **Oct 2020 – Oct 2021 (On-site)**

- Translated Figma prototypes and UI/UX designs into pixel-perfect, responsive production interfaces.
- Built reusable and scalable React components and UI patterns across multiple projects.
- Optimized responsive interfaces for cross-browser compatibility and mobile-first experiences.
- Integrated REST APIs and collaborated with backend developers to deliver production-ready features.

Tech Stack: React, Vue.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap, TailwindCSS

Selected Projects

Muallim Admin — Web App

Role: Frontend Developer

- Built and implemented a reusable local component library, translating Figma designs into reusable UI components and responsive application interfaces.
- Developed and delivered 5 production features, covering UI implementation, responsive design, frontend performance optimization, and REST API integration.
- Used AI-assisted coding tools throughout the development lifecycle, from component implementation and UI development to feature completion and end-to-end delivery.
- Wrote and executed automated tests using Jest and Playwright to validate application functionality and support release quality.
- Monitored application behavior after production deployment, identifying and investigating issues to help maintain application stability.

Muallim Teacher (App)

Role: Frontend Engineer

- Built a cross-platform mobile application from scratch using React Native.
- Developed and shipped 3 production features for iOS/mobile platforms.
- Integrated REST APIs and implemented authentication, asynchronous data handling, and reusable mobile components.
- Collaborated with backend and QA teams to debug, test, and release production features.

Markopolo Web App

Role: Full-Stack Engineer

- Built and maintained an enterprise marketing automation platform using React and TypeScript.
- Developed campaign analytics dashboards and reporting interfaces.
- Optimized rendering performance through lazy loading, memoization, and code splitting, significantly reducing page load time.
- Built reusable UI modules used across multiple features.

Deepdive (Markopolo.AI)

Role: Frontend Developer

- Developed data-intensive analytics dashboards for an AI-powered sentiment analysis platform.
- Built reusable interactive visualizations for reporting, filtering, drill-down analytics, and dynamic data updates.
- Developed custom charts including pie, stacked bar, line, scatter, and geographic heatmaps using D3.js and other visualization libraries.
- Integrated REST APIs and transformed complex datasets into frontend-ready data for charts, maps, tables, and analytics.
- Optimized rendering and data presentation for complex datasets while maintaining responsive and user-friendly interfaces.

Paikari (Hishabee Technology Ltd.)

Role: Frontend Developer

- Developed a B2B wholesale e-commerce platform for sellers and buyers, building responsive and reusable UI components from Figma designs using React, Shadcn UI, and Tailwind CSS.
- Implemented responsive interfaces and business workflows across key modules, including Product List, Stock Khata, Stock Dashboard, Stock History, Party Khata, Expense Management, Accounts, Business Reports, Profile, Subscription, Access Management, and Settings.
- Integrated REST APIs and third-party services to enable seamless data exchange and support core business operations across inventory, orders, accounts, and reporting workflows.
- Built reusable, maintainable frontend components and optimized layouts for consistent user experiences across different screen sizes.

Stripe Payment Integration — MERN Stack

- Developed product page and shopping cart functionality for a MERN-stack e-commerce application, extending the existing frontend from static product displays to functional shopping workflows.
- Integrated Stripe Checkout to enable payment processing through Stripe's hosted checkout experience.
- Implemented backend payment logic and Stripe Checkout Session creation to connect the application's checkout flow with Stripe.
- Collaborated directly with the client to deliver the requested e-commerce and payment integration features.

Client Rating: 5.0/5 — Recognized for fast delivery, reliability, and willingness to assist with additional tasks.

React.js & Strapi CMS Integration

- Set up a React.js template with Strapi CMS as part of a client project.
- Worked with the Gigaland Redux CMS template in a React.js development project involving Strapi.
- Delivered freelance development work across two client engagements, receiving 5-star ratings for both projects.
- Recognized by clients for professionalism, clear communication, collaboration, commitment to quality, and reliable delivery.

Client Rating: Two projects rated 5.0/5, including "Excellent as always!!!"

Technical Skills

Programming Languages: JavaScript (ES6+), TypeScript

Frontend Development: React.js, Next.js, React Native, HTML5, CSS3, Tailwind CSS, Sass/SCSS, Responsive Design

Backend Development & APIs: Node.js, Express.js, NestJS, RESTful API Development, API Integration, Authentication & Authorization, JWT, OAuth 2.0

Databases & Data Modeling: MongoDB, Mongoose, Database Modeling

Payment & Third-Party Integrations: Stripe Checkout, Payment Integration, Third-Party API Integration, Facebook Marketing API, Google Ads API, TikTok API, Strapi CMS

State Management & Data Fetching: Redux Toolkit, RTK Query, React Query, Zustand, Context API

UI Libraries & Forms: Shadcn UI, Radix UI, Mantine UI, Material UI, Ant Design, React Hook Form, Zod

Testing & Code Quality: Jest, Unit Testing, Playwright, End-to-End Testing, Code Review, Debugging

Cloud, DevOps & Deployment: Docker, CI/CD, GitHub Actions, AWS S3, AWS Cognito, PM2

AI-Assisted Development: GitHub Copilot, Claude Code, Cursor, Google Antigravity

Engineering Practices: Software Architecture, Component Architecture, Clean Code, SOLID Principles, Performance Optimization, Agile/Scrum, Sprint Planning, Technical Documentation

Education

Sonargaon University, Dhaka — *BSc in Computer Science & Engineering (CSE)*

 July 2022 – Sep 2026 | CGPA: 3.39

Bogura Govt. Polytechnic Institute, Bogura — *Diploma in Computer Technology*

 July 2016 – Feb 2020 | CGPA: 3.66

Certifications

- [JavaScript \(Intermediate\)](#) HackerRank
- [Frontend Developer \(React.js\)](#) HackerRank
- [Back End Development and APIs](#) FreeCodeCamp

Languages

- Bangla (Native)
- English (Professional)
- Hindi (Conversational)
